Attachments: Study Quality Table - All Cancers - August 17 2015.docx

In the table starting on page 8, right-most column, the text has been edited to say "Exposure Group A", later on, Groups B, C, D. I can figure most of the conversions out but I had not seen this nomenclature before and was looking for the definitions but did not find them in the IRIS Handbook. I wondered where they came from.

I'm not sure what you are talking about.

I don't see this in the handbook. Perhaps my copy is out of date?

Since I am home today, dodging to Pope, could you send me the document with the definitions?

Thanks!

Tom
